

**Consultation using the Skin Diagnostic 202 | 45mins+ complementary with any Facial Treatment**

**\$45**

**or**

For new clients we suggest an individual consultation and skin health analysis, after which your therapist will select a facial treatment sequence to address your particular needs. Our treatments are focussed on *sun damage repair, decongestion* and *support of the skin's natural functions*. They include thorough cleansing, mechanical or chemical exfoliation, extractions if necessary, traditional European massage of the face, décolletage and scalp, or the Signature Phyt's lymphatic drainage technique, infusions of active ingredients using galvanic, iontophoresis, micro-current and ultrasonic technologies (available April), soothing face masks and UV protection.

*aesthetica Signature Facial*

- Allow your therapist to select the exact formulations from our ranges for your 1 ½ hr escape. Not simply relaxation but a specific facial skin treatment which also incorporates the feet, spinal & scalp massage, healing light therapy & a facial lift sequence      1hr30 \$159
