Some of the skin-types and conditions treated during an Advanced Facial Treatment:

- | | |
|--|---|
| Underactive & dry skins | Rosacea, sensitivity or compromised skins |
| Melasma, hyperpigmented, photodamaged or thickened skins | Dehydration |
| Acne, overactive skins, enlarged pores | Mature & delicate skins |
| Fine lines and wrinkles | Eczema, dermatitis, inflamed conditions |
| Young skins that need guidance! | Great skins that require maintenance! |

The equipment we use as needed during an Advanced Facial Treatment:

- ULTRASONIC CLEANSING - Ultrasonic & low level micro-current for cleansing & massage via a computerised brush or blade system
- MICRO DERMABRASION - Diamond Micro-dermabrasion for exfoliating & peeling
- LED - Light emitting diodes for light therapy to heal, soothe & stimulate
- MICRO LIFT - Gentle "wave current" or micro-current for facial skin & muscle firming
- BIOPTRON - Medical grade light therapy for healing soothing & increased immunity
- DF MACHINE - Iontophoresis & sonophoresis for penetration of compounds including Vitamin A
